

Training Workshop

KI-DISCUS MK2 / MK3 - Designed to meet the test specification in BS.EN12469:2000 as a method for measuring operator and aperture protection factors in Class I and Class II microbiological safety cabinets

TRAINING WORKSHOPS

CTS training workshops provide analysts with the knowledge and necessary tools to undertake a Ki-Discus test safely and efficiently.

DETAILED TRAINING PROGRAM

1. Brief history of the development of the Potassium Iodide test to determine operator protection as required by BS 5726 and the current BS EN 12469:2000.
2. The principle of the test and the definition of Operator Protection to 10^5 .
3. The hierarchy of tests and the place of Ki-Discus in those tests.
4. Set up the equipment, carry out pre test checks and carry out test on a Class1 or Class 2 safety cabinet. Analyse results.
5. Cleaning and maintenance of equipment including simple fault analysis.
6. Completion of test paper.
7. A certificate would be issued for each attendee who completes the training.

COURSE INFORMATION

CTS will provide a Ki-Discus MK2/MK3 to use, the necessary consumables and the handout "How to use Ki-Discus" for each attendee.

- Duration: 5-6 Hours
- Class Size: Up to 3 People.
- Location: Client's site or Ki-Discus Facility (Portsmouth, UK).

A. The course can be carried out at our premises where a Class 2 cabinet is available.

B. The course can be carried out at your premises provided a Class1 or Class 2 cabinet is available. Any accommodation, refreshments or food would be your responsibility.

KI-DISCUS is a Trade Mark registered in the United Kingdom and other countries. Designed and manufactured in the United Kingdom. In view of our policy of continued improvement, the company reserves the right to change the specification without notice.
